

One of our major events at MRV Cares is ICSS. The International Climate Solution Summit is a summit where we invite the brightest minds to submit research papers on giving solutions to the topic statement based on a current climate change crisis. This idea was very well received by everybody especially our principal and trustees who supported our idea with great enthusiasm. We have the event planned for December this year with all the logistics done. This event will be the perfect place for people to showcase their innovation and passion to combat climate change. We also discussed our idea with the State's minister of Environment and Tourism who loved our idea and was motivating us to continue this same. ICSS will be a revolutionizing platform and our team couldn't be more excited for it.

Another of our major event was "The Week of Joy". Held during Christmas of 2021, that week members had to do a good task each week and then upload photos and videos of them doing the same. Tasks ranged from donating food, to planting trees to learning something new. Kindness week was a huge success amongst the members and all of them liked the idea greatly. All the members really enjoyed the joy they derived from it and it was something which enjoyed looking at too. It was done to instill a sense of helping the community service.

Ethic Series is the most recent event. This event works by members making charts on the topic set for the month like Inclusivity of the Disabled, Cheating, Bullying, Discrimination and many more. These topics are important for teenagers to understand so that they apply these values in the future and become more responsible citizens.

MRV Cares wants to ensure our events benefit our members and the society too and we begin this continuous process of serving the community.

INTERNATIONAL CLIMATE SOLUTION SUMMIT

*What is
ICSS?*

ICSS stands for International Climate Solution Summit is an international competition for students. This platform allows students to lend a hand in the fight against climate change. Participants will submit carefully created research papers which will be a contribution towards our cause of fighting against climate change.

Timeline

25th March- The registration for the competition begins. It will be through a google form on the website.

8th April - The topic statement will be released. Alongside that, website links, sample papers and other resources will be sent as aids. The participants can now start researching more about the topic to expand their knowledge. The resources are just reference guides as starting blocks for participants to begin their research.

15th April- Introductory meeting for registered and potential participants. The meeting will explain the competition, and will also inform about the benefits of participation in tournaments such as there

18th April- The deadline for registration. After this date, no more registrations will be accepted.

25th June- Last day for submitting the papers. The submission will also be on the website via google forms.

1st August- The judges will finalize the winners.

2nd August - The winning ceremony is held. The participants will attend this meeting to know the winners and will be thanked for their support

Our Vision

Antarctica Ice-Mass Melting, Rise in Sea Level, Spike in Global Temperatures. These are only a few of the hundreds of effects due to Global Warming.

It is every country's goal to create a cleaner, safer and healthier Earth, our aim is having young minds think of unique ideas to overcome issues of climate change, to instill a sense of care for the wellbeing of Nature and to remind all the other humans that it is not too late to make changes for the betterment of our world.

With the help of everyone participating we can have multiple alternatives that can help us overcome these life-threatening changes to humans as well as other species in the world. We hope that our generation will help set the base for future generations to build on, to obtain a healthy and habitable Earth.

Benefits of Participating in ICSS

Other than the pleasure of saving the world there are many advantages for you to participate in ICSS. First one being Research and Analytical skills. Your judgement of what's factual out of the thousands of websites available. Weighing in the cost and efficiency of the process/ideas you may suggest would really make you observant of the choices you have further in life. Being exposed to a large audience of participants would help you see things from different perspective, every cognition and thinking process is different which help you evaluate and experience new thoughts and the uniqueness behind it. Along with personal skills MET Rishikul Vidyalaya will also provide participants a certificate and the winning participants(s) would also receive an exciting cash prize!

Our Partners

CSM (Change Social Mindset) was started by Riya Sharma and its purpose is, as the name says, changing social mindset. There are a lot of issues in our society which can be solved simply by talking about them in an open and understanding environment, and this is what we aim to do with our sub-units and through the main organization. CSM will bring around the change required for the development of this society, and your help is greatly appreciated in this.
